

Imprivata Confirm ID for Clinical Workflows

With JAC's Electronic Prescribing and Medicines Administration (EPMA) system

JAC in partnership with Imprivata

Drive adoption of JAC's EPMA system by simplifying user authentication workflows

Improve efficiency by replacing usernames and passwords with fast, automated authentication

Improve auditing by increasing visibility into e-prescribing and other medication management workflows

Imprivata Confirm ID™ for Clinical Workflows enables fast, secure authentication within the JAC Electronic Prescribing and Medicines Administration (EPMA) system, including witness signing for drug administering and other medication workflows.

Fast, convenient authentication

To increase security and visibility into clinicians' interactions with prescriptions and patient information, organisations can require providers to authenticate when completing these processes.

Imprivata Confirm ID for Clinical Workflows integrates with the JAC EPMA system to streamline this workflow by enabling fast, convenient authentication through the simple tap of a proximity badge, replacing the manual entry of usernames and passwords.

By enabling care providers to quickly and conveniently authenticate when completing workflows within the JAC EPMA system, Imprivata Confirm ID for Clinical Workflows improves efficiency, increases provider satisfaction, and allows for more time to be spent on patient care, all while improving security, patient privacy, and auditability.

This helps organisations drive adoption of the JAC EPMA system to transform how automated medicines management and electronic prescribing can be used in the delivery of patient care.

For more information about Imprivata Confirm ID for Clinical Workflows, visit <https://www.imprivata.co.uk/uk/clinical-workflows>.

“Imprivata optimises our use of the JAC system by delivering fast, convenient authentication for witness signing. This improves efficiency and helps create a more complete audit trail for prescribing, administering, and disposing of controlled drugs.”

Grant Harris, Director of IT at Western Sussex Hospital NHS Foundation Trust

Imprivata Confirm ID: The comprehensive identity and multifactor authentication platform for healthcare

Imprivata Confirm ID for Clinical Workflows is part of a comprehensive identity and multifactor authentication platform for clinical authentication workflows across the healthcare enterprise.

Imprivata Confirm ID makes security invisible by offering a broad range of innovative, convenient authentication methods, including fingerprint biometrics and proximity badge.

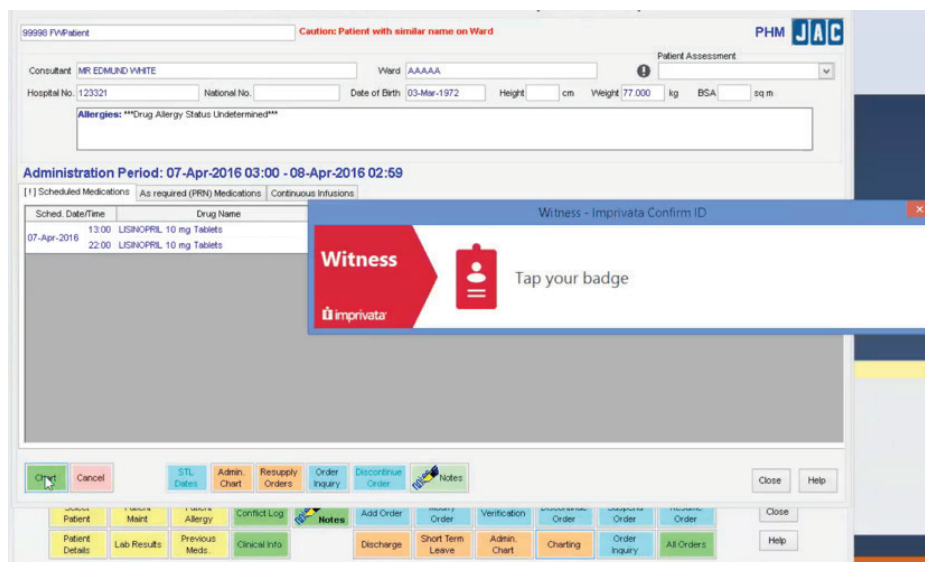

Imprivata Confirm ID combines security and convenience by enabling fast, secure authentication across enterprise workflows while creating a secure, auditable chain of trust wherever, whenever, and however users interact with patient records and other sensitive data.

About Imprivata

Imprivata, the healthcare IT security company, enables healthcare globally to access, communicate, and transact patient information, securely and conveniently.

The Imprivata platform addresses critical compliance and security challenges while improving productivity and the patient experience.
